Abstract (en)

The present invention relates to a method of packaging prepared fresh vegetables which are ready for use and accessory ingredients. This method consists in inserting the fresh vegetable which is ready for use into a tubular envelope (12) by means of separate feed streams, in reclosing this tubular envelope by heat sealing, in inserting the ingredients into the open part of the tubular envelope thus formed, in reclosing the upper end of the tubular envelope and in cutting the two-compartment bag thus produced. The present invention also relates to a line for processing and for implementing this method and the bag of fresh vegetables which are ready for use thus produced. <IMAGE>
