Abstract (en)

Lateral forming walls constituted by endless moving belts (11) are stretched between a roller (12) with a horizontal axis AA' disposed at the level of the horizontal conveyor bands (9) and a shaft (13) with a vertical axis BB' placed laterally at the output of the said bands, the said belts forming helically contoured channels for folding down the edges of the cardboard blanks displaced on the horizontal bands. Application to the manufacture of cardboard boxes.
