Abstract (en)

[origin: EP0449010A1] In a sorter for the sorted depositing of recording media, a transporting unit (32) receives the recording media (12) and conveys the latter to a selected deposit compartment (16). The transporting unit (32) circulates on a continuous positioning belt (24). In the transporting unit (32), the sheet (12) of paper is gripped and held by rollers (34, 36). A single motor (26) drives the positioning belt (24) of the transporting unit (32) and a drive belt (42) for its cylinders (34, 36). <IMAGE>
