Abstract (en)

A security closure for containers, in particular for oil cans, comprising one single component and a collar portion (14) suitable for being applied inside an opening (13) provided through the cover (11) of a container, from which a pouring spout portion (15) extends, said collar portion (14) having a bottom wall (16) facing the interior of said can, with a lower annular lip (17) radially protruding outwards, through said bottom wall (16) two through holes (18,19) being provided, which holes are closed by portions (20,25) of tear-away material, an upper lip (23) of said collar portion (14) constraining the edge of said opening provided through the cover through an intermediate annular (24) reverse-"L"-shaped shell portion directed downwards to embrace it, with said intermediate shell portion extending from said pouring spout portion (15) and a thread-like appendix (25) being furthermore connected with an external wall of said intermediate shell portion, said thread-like appendix bearing a cap element (26) suitable for entering said collar portion above said bottom wall. <IMAGE>
