Abstract (en)
[origin: EP0449725A1] This device comprises a high voltage current source comprising a multiple output coil (1) and a connector (2) fitted on this coil and provided with connecting inputs to each of the high voltage outputs (32) of the coil (1) and outputs for each of the ignition leads (3) supplying the spark plugs of the engine. Each input is enclosed by a fitting sleeve (22) on a projection (24) of the output of the coil. The connector also comprises an aperture for receiving the head (48) of a snap-on element (50) carried by the coil. <IMAGE>
