Abstract (en)

[origin: EP0449734A1] According to the invention, this strip comprises: a generally flat sole (1); two main arms (2, 3) which arise from the sole (1), perpendicularly to it; a bridge (5) for linking the ends of the said main arms (2, 3) and two secondary arms (6, 7) which extend parallel to the sole (1) from the main arm (3) which is furthest away from the free edge (1C) of the sole, these two secondary arms having substantially equal widths (L); the sole (1) and the main arms (2, 3) being produced from a semi-rigid, hard material and the linking bridge (5) being produced from a flexible material. <??>One application is the production of the zone for connecting a flooring and a partition wall which are tiled. <IMAGE>
