Abstract (en)

The present invention relates to an apparatus for handling and transporting profiles, in particular metallurgical profiles, of girder, tube or other type, characterised in that it consists essentially of a support (1) for fastening to a hook of a lifting travelling crane carriage, via mobile fingers (2) mounted in the lower part of the fastening support (1) and via a lifting cable, chain, sling (3) or the like which is fixed in the lower part and on both sides of the fastening support (1). <IMAGE>
