Abstract (en)

[origin: WO9105893A1] A drawing system of a drawing frame for drawing slivers comprises pairs of preliminary drawing and main drawing rollers which form drawing system rollers (30, 31, 32) that are driven by force-transmission means. At least one of these force-transmission means is a flat belt (20; 21; 22; 23; 24) looped around a driving disk. The length of the flat belt which passes around at least one of these driving disks (2; 3; 4; 5; 6; 7; 8; 9; 10; 11; 12) is increased by arranging deflecting rollers (13; 14; 15; 16).
