Abstract (en)
[origin: EP0450264A2] The invention relates to a method for drying roofs, having profiled metal sheets, in particular corrugated or trapezoidal sheets, arranged under the insulation, by sucking out air and/or forcing it in, openings, to which hoses and/or tubes for the vacuum or compressed air are fixed, being introduced from below into the sheets in the region of the downwardly projecting corrugations or trapeziums. <IMAGE>
