Abstract (en)

[origin: EP0451045A1] Installation for removing slag for cupola-furnace crucibles (wells), comprising a shaft (25) driven in rotation by a motor (23) and carrying at its lower end tools (27) for removing slag deposited in the crucible (well), characterised in that the tools (27) for removing slag are rigidly connected to the drive shaft (25) so as to permit the removal of slag from the crucible (well) in the molten metal. <IMAGE>
