Abstract (en)

[origin: EP0451120A2] The method includes, first, the manufacture of the vamp (2) with open bottom and of the sole (4) with a seating (5) along its perimetrical border, and subsequently the manufacture of an element (3) interconnecting the lower border of the vamp with the perimetrical border of the sole (4). After having carried out a temporary dap joining of the interconnecting element (3) with the perimetrical border of the sole (4), the joining between the sole and the vamp (2) is fixed by a seam (9a). According to one of the various embodiments, pre-sole (15g), is used to which the interconnecting element (3g) is fastened, and which is joined to the sole together with the vamp. <IMAGE>
