Abstract (en)
[origin: EP0451840A2] The invention relates to a device for the prevention of misuse of an electrical appliance. A timer switch (1) can be arranged lockably in the housing (42) together with a plug (5), which is situated in the socket-outlet (4) of the timer switch (1) and is arranged on a line (6) which leads to the electrical appliance to be protected. The housing (42) has at least one opening (40, 41) for guiding through the power cable (11) of the timer switch (1) and the line (6) connected to the plug (5). <IMAGE>
