Abstract (en)

[origin: EP0452190A1] The system is characterised in that it comprises a portable device (16) permitting intercommunication with a command and control device (6) associated with a group of lockers by means of a wireless, preferably infrared, link, in such a way as to permit a user to accomplish particular functions. <??>The system finds an application in left luggage lockers used especially in stations and/or airports. <IMAGE>
