Abstract (en)

[origin: EP0452756A2] Anchorage device for optically frameless glazings, comprising two-part supporting mullion profiles (1) and likewise supporting transom profiles (2) and also modular frame profiles (3) anchored in the latter. The modular frame profiles (3) here are constructed either as immovable fixed sections or as movable casements. The two-part mullion profile is formed from a basic body (8) and a cover shell (9). Closing plates (24) with integral guide grooves (34) are formed onto the mullion profiles (1) and the transom profiles (2). Reaching into the guide grooves (34) are transom pins (23) which protrude from the modular frame profiles (3) towards the guide grooves (34). <IMAGE>
