Abstract (en)
[origin: EP0453009A2] The invention relates to a garment, in particular a dress or a blouse provided with a front piece, a back piece, sleeves as well as with a neck. The part of one of the pieces joining up with the neck is formed by two parts separated along a dividing line at least substantially extending in the longitudinal direction of said piece. Detachable fastenings are provided, which extend from the free ends of the sleeves, through the sleeves and through the piece in question, up to the dividing line, so as to detach or interconnect, as the case may be, the parts of the garment located above and under the detachable fastening. <IMAGE>
