Abstract (en)

Display panel of the type essentially comprising a display support 7 arranged in a frame 4 provided with a cover 5, this frame being supported by a structure 2 at a height sufficient so as to put the panel out of reach of the public. It comprises a motorised system which is meant to be actuated from the ground by a remote control 9, and to successively cause the opening of the said cover 5; the lowering of the said support 7 down to the ground, from the normal position which it occupies in the said frame; then the re-ascent of the said support 7 up to the said normal position; and the closing of the said cover. <IMAGE>
