Abstract (en)

Insulation for cooling pipes for furnaces consisting of prefabricated modules which comprise a support reinforcement (11) which consists of at least two curved metal elements (15) which are capable of enclosing the heat-exchanging pipe or pipes (19) to be insulated at a distance from the reinforcement and which can be opened in the manner of pincers and can be locked, the elements (15) being interconnected by distance pieces (13) stacked on the distance pieces (21) between two curved metal elements (15). <IMAGE>
