Abstract (en)

[origin: WO9008192A1] A process is described for the introduction of exogenous DNA into somatic and germ animal cells: the DNA, exogenous or modified according to known techniques of recombinant DNA, is introduced into the animal spermatozoa which are to be modified and said spermatozoa are employed for egg fertilization according to usual artificial fertilization techniques.

Abstract (fr)

L'invention concerne une technique d'introduction d'ADN exogène dans des cellules animales somatiques et germinatives, consistant à introduire l'ADN, exogène ou modifié selon des techniques connues de génie génétique, dans les spermatozoïdes étant employés pour la fécondation d'oeufs selon des techniques habituelles de fécondation artificielle.
