Abstract (en)  
This invention relates to luminaires suitable for illuminating roadways. Reflector means are arranged within a housing around a light source (3) and comprise two side reflectors (6,6) located one on each side of the light source, being shaped to direct light to the upper (7) and lower (8) gaps therebetween, while a "gull-wing" reflector (9) is located, spaced apart above the light source and arranged to reflect light around the outside of the side reflector means. <IMAGE>
