Abstract (en)

[origin: EP0454144A1] An elongated strip (10, 10a, 10b) providing a multiplicity of prospective end stops (11, 11a, 11b) for a slide fastener is disclosed. A succession of prospective end stops (11, 11a) in the strip are interconnected by a flexible connecting cord (12, 12b) such that the strip can be disposed flexible and supple and thus conveniently wound on a reel (30). Each end stop (11, 11a, 11b) is reduced centrally in thickness to provide a thin bridge (15, 15a) which serves as a hinge about which the end stop is accurately and easily folded. <IMAGE>
