Abstract (en)  
[origin: EP0454159A2] The hanger exhibits a rod (1) with flattened cross section, in the centre of which a hanging hook (2) projects upwards, clamps (3) opening downwards, which each exhibit two clamp jaws (4) each with two openings (6) to carry the clamp jaws (4) on the rod (1), and a spring (7) which holds the clamp jaws (4) closed. The openings (6) have concave limit stops (11) at the top and bottom and convex limit stops (12) at the sides, the clearance of the concave limit stops (11) corresponding to the longer transverse dimension of the rod (1) and the clearance of the convex limit stops (12) at the sides corresponding to the smaller transverse dimension of the rod (1) in each case with the slight play required for free movement. The openings (6) of the two clamp jaws (4) are equal. <IMAGE>
