Abstract (en)

This package comprising an envelope constituted by a film of synthetic material and an attached handle made from a tape of flexible and strong material fixed to the envelope at its ends is characterised in that the envelope (4) is provided with a preferred line of rupture (8) allowing an opening to be formed for the extraction of the objects, and in that the handle (6) is disposed across the said line, one of its ends being rendered integral with the envelope by a removable attachment means (7). <IMAGE>
