Abstract (en)

Packaging of pipe fittings, valves and working accessories is noteworthy in that it comprises a case or container (1) made of plastic material receiving, in its upper part by clipping, a cover (2) fitted with additional assembly means on its periphery (2.1), the said cover being arranged to receive means of positioning and fixing the valve body (3); the said cover being reversible and ensuring the closure of the case with the valve body in a suspended position, and constituting, after removal from the case, the support plane on the ground for the valve body. <IMAGE>
