Abstract (en)

The invention relates to an arrangement of a clamping holder, preferably intended for retaining a light fitting, e.g. at the edge of a shelf or table. The holder (1) has two legs (3,4) kept together by a connecting portion (2) and clampable to a shelf or the like by means of a gripping portion (5). Between the rear free end (16) of the holder (1) and the connecting portion (2) one leg (3) is provided with a tongue formation (7) projecting towards the other leg (4) and which is in latchable coaction with a latch means (8) on the other leg (4) for enabling latching of the rear end (6) of the legs (3,4) with the legs in a position where they are urged apart for achieving an increased clamping effect in the gripping portion (5). <IMAGE>
