Abstract (en)
[origin: EP0454655A1] In a ski (1) with a damping element (5) for damping shocks acting transversely to the longitudinal direction of the ski in the region of a ski binding, with a support body (3) for at least one layer of damping material (5), in particular elastomeric damping material, arranged between the support body (3) and the ski (1), the support body (3) is, in a central region (4) lying between its front and rear ends lying in the longitudinal direction of the ski, rigidly connected directly to the upper belt (7) of the ski, and, in front of and behind the central region (4), connected to the upper side of the ski (1), the damping material (5) being interposed. <IMAGE>
