Abstract (en)

[origin: EP0454965A1] The invention relates to a mortise lock, in particular a lock with a driving rod, having a latch, which is actuatable via a plug and a handle nut, and a bolt, and also fitting screw passage holes in the lock casing, and proposes, to obtain a solution which is advantageous in particular in terms of construction, that the lock casing (2) has in a rear corner region an indentation (106) whose depth, lying in the fore-end direction, reaches beyond the extension of the joining line (L) of nut (97) and fitting screw passage hole (100). <IMAGE>
