Abstract (en)

[origin: EP0455008A2] The invention relates to an offset printing machine with an inking unit and a dampening unit, inking unit and dampening unit having ink and moisture spreading rollers which interact with a forme and being connectable via at least one intermediate roller. For variable operation, it is envisaged that the intermediate roller (31) is mounted in such a positionally variable manner that its position in relation to the ink and/or moisture spreading roller (34, 35) can be adjusted in a freely selectable manner according to the situation. <IMAGE>
