Abstract (en)
[origin: EP0455045A2] The vehicle comprises a motor-driven flap or door (2) through which a stretcher (4) carrying a patient can be pushed into the interior of the vehicle or can be removed from the interior of the vehicle. The drive mechanism for the door or flap (2) is provided with a wirelessly functioning remote-control device whose manually activatable control part (5) can be operated remote from the vehicle (1).
