Abstract (en)

The multiple-cutter insert fixing structure (20) particularly for wood-working tools comprises a tool defining a seat (21) accommodating an element (22) for locking the multiple-cutter insert (23). The locking element (22) has a cavity (40) formed therein which accommodates a pin (41) for fixing the locking element (22). The outer ends (42) of the fixing pin (41) and the locking element (22) define a portion of a groove (60) for permitting the escape and removal of shavings produced by the multiple-cutter insert. <IMAGE>
