Abstract (en)
The accessory comprises a support (1) in the shape of an artist's palette, having a series of receptacles (3) fixed onto it in a removable manner. These receptacles are intended to contain different perfumes. Their leaktight closure is assured by a diaphragm (10) of the photographic type which is opened or closed by turning a ring (11) provided on each receptacle (3). In order to use the perfume, the user will employ a paint brush which she will dip in the receptacle or receptacles of her choice, which she will have previously opened by actuating the diaphragm (10) of the receptacle using the ring (11). <IMAGE>
