Abstract (en)
[origin: EP0456072A1] The platforms 2 and 3 of the parking device are moved by scissor arrangements 6 and 23 respectively and by cylinder/piston arrangements 17 and 25 respectively. The cylinder/piston arrangements stand substantially perpendicularly to the orientation of the platforms and the scissor arrangements in the collapsed state. This enables the scissors to be brought close together and avoids dead centre positions and unfavourable lever arms. <IMAGE>
