Abstract (en)

[origin: EP0456632A1] A method of manufacturing a centrifugal pump impeller, preferably a radial or radially angled centrifugal pump impeller, of sheet metal construction is characterised in that the impeller blades (1) are produced by flanging with an essentially pointed or sharp-edged deep-drawing tool (7) along especially constant curve paths (2) in the pressure-side and/or induction-side wheel side wall (3, 4). <IMAGE>
