Abstract (en)
The invention relates to a ski and a method of manufacturing it, consisting of an upper decorative and protective subassembly and of a mechanical lower subassembly. <??>The decorative and protective subassembly is a twin layer consisting of a polyamide, of a styrene copolymer, and of a carboxylic acid or an anhydride thereof or an alloy containing this copolymer. This twin layer may be coextruded and has excellent properties of adhesion with the mechanical lower subassembly during the operation of moulding of the ski. <IMAGE>
