Abstract (en)

The shaft for heddle frames comprises a bar (1) on which surface layers (2) made of non-metallic material are associated. The bar (1) and the layers (2) delimit a box-like compartment (3) which is filled with a non-metallic material (4) and is closed, on the side opposite to the bar, by a member (5) which is shaped so as to have anchoring points (6) for heddles. <IMAGE>
