Abstract (en)

[origin: EP0458007A1] The present invention relates to a metering column of electronic carousels for the bottling of liquified petroleum gases. This metering column has an integral body in vertical arrangement including a basically cylindrical volume which is fixed to the ground through an anchor (20) and in which several sections can be seen from which an upper one is defined by an antideflagrant box (2) which includes a power revolving collector (1). The bottom part includes an electrical power supply (3), whereby the upper section is connected by its base to other two sections of the column with similar characteristic and a basically cylindrical outline. <IMAGE>
