Abstract (en)

[origin: EP0458660A1] The present invention relates to an installation for stitching pieces of fabric. The installation is characterised in that it comprises means (2, 3, 10, 11) for moving a sewing machine (4) which are arranged in order to permit either a continuous or a step-wise movement of the machine (4) depending on the nature of the pieces of the covers to be stitched. The invention is applicable in the field of automobile equipment. <IMAGE>
