Abstract (en)

[origin: WO9009287A1] A stacking device for pre-folded continuous stationery (13) in a fast printer (10) is pivotable. It may be swung from a basic position (A) by means of a guide system first into an output position (B) without altering the height of the paper output area. It can be swung further into an additional output position (C), the height of which is adjustable.
