Abstract (en)

[origin: EP0459146A1] A device (10) is proposed for applying a writing, drawing, printing or painting liquid and the like to a surface, comprising a liquid container (11), a writing, drawing, printing or paintbrush tip (12) and the like, an air supply pipe (13), by means of which the container interior (25) is connected to the outside atmosphere (14), and a capillary liquid reservoir (15). The capillary liquid reservoir (15) constitutes a liquid delivery connection (16) between the liquid (17) situated in the liquid container (11) and the tip (12). In a position in which essentially the tip (12) is directed downwards, the liquid delivery connection (16) is interrupted. <IMAGE>
