Abstract (en)
[origin: EP0459170A1] A holder for an essentially cylindrical miniature incandescent lamp for placement onto a printed-circuit board such that it makes contact, having contact elements which open in the base surface, are intended for resting on mating contact surfaces of the printed-circuit board and can be connected to the lamp wires such that they make contact electrically, said holder being provided with a recess which reaches at least into the vicinity of the lower, essentially flat base surface and is intended to hold the miniature incandescent lamp in a horizontal position.
