Abstract (en)

Electromechanical programmer with smooth program preselection having a main rotary cam-unit (3) executing several operating programs, a cam (4) allowing transfer of pitch to this main cam-unit (3) and driven in rotation by a micromotor (5) via a speed-reduction system (6), and a smooth program preselection cam (10), characterised in that it comprises a retractable mechanical drive device (8) ensuring a mechanical link between the main rotary cam-unit (3) and the cam (4) allowing transfer of pitch under a command from the smooth program preselection cam (10). <IMAGE>
