Abstract (en)
[origin: WO9108771A2] Method for the culture of Babesia divergens, characterized in that the Babesia strain is maintained under culture in a culture medium free from serous protein but containing lipoproteins and red blood corpuscles, and a method for preparing exoantigens and a vaccine containing these antigens.

Abstract (fr)
La présente invention concerne un procédé de culture de Babesia divergens, caractérisé en ce que la souche de Babesia est maintenue en culture sur un milieu de culture exempt de protéine sérique mais contenant des lipoprotéines ainsi que des hématies, ainsi qu'un procédé de préparation d'exoantigènes et un vaccin contenant ces antigènes.
