Abstract (en)

[origin: EP0460370A1] The invention relates to a socket for multipole connectors, especially for the electrical connection of motor vehicle trailers to a socket housing (1) and a contact support insert (2) for holding contacts which are to be connected to electrical conductors (3), which socket has a central contact holding section (4) to which rearward supporting parts (5) are connected for support on the mounting surface. In order to simplify a secure mounting, it is provided that the contact support insert (2) consists of a contact insert (6) forming the contact holding section (4) and of a separate supporting body (7) which can be connected thereto and has the supporting parts (5). <IMAGE>
