Abstract (en)
[origin: EP0460980A1] The movable wall of the variable volume (5) is constituted by a diaphragm (4) made of elastomeric material preshaped to have a main part (22) and a control part (24) of reduced surface area, which is offset towards the outside in relation to the main part and arranged to interact with the pressure reducing valve (12) which selectively delivers the breathing gas (14) into the variable volume (5). <IMAGE>
