Abstract (en)

[origin: EP0461384A2] An installation for the diagnosis of multi-coil ignition systems is proposed, which contains a signal bus (26), which is designed as a spiral cable and interconnects parts (24, 48) which can be plugged to the ignition coils (10, 36) for capacitive signal coupling (28, 50) between the ignition coils (10, 36) and the signal bus (26). Further capacitive couplings (32, 54) are provided between the plug-on parts (24, 48) and the signal bus (26). <IMAGE>
