Abstract (en)

The invention relates to a watch with time-zone display elements. The aim of the invention is to produce a device enabling the user to indicate which time zone he has used to set the hour displayed by his watch. This aim is achieved with the aid of a wrist-watch equipped with elements presenting at least one geographical indication of one of the 24 time zones, characterised in that the said elements comprise at least one element (11), immobilised on the bracelet (3, 7) of the watch in a removable manner and permitting selective indication of the name of a city located in one of the 24 time zones. <IMAGE>
