Abstract (en)  
[origin: WO9010775A1] Hinge arrangement for mounting, on a door frame (1) equipped with a hinge component (2) of an earlier type provided with a pin, a door leaf (4) provided with a fixture (20) of a more recent type. The fixture (20) permits insertion, from any chosen side of the door leaf (4), of a snap-in element (13) of a more recent type which is provided with a knuckle (14) for mounting on the said hinge component (2). The invention is characterized in that the said snap-in element (13) is, in the longitudinal direction of the knuckle (14), symmetrically positioned in relation to the centre of the knuckle (14), and in that the knuckle (14) can be turned for application of any chosen end (16, 17) on the said hinge component (2) provided with a pin. The knuckle (14) is moreover provided with an end plug (18) which is designed detachable for positioning on any chosen end (16, 17) of the knuckle (14).
