Abstract (en)
[origin: WO9108033A1] A plastic toy building kit is composed of two or more components which can be easily clamped together. The bulk density and strain hardness of the plastic from which the components are made are of decisive importance.

Abstract (fr)
Un jeu de construction en matière plastique permet de relier aisément deux ou plusieurs éléments par serrage. La masse volumique apparente et la résistance aux contraintes de la matière plastique utilisée déterminent si celle-ci convient comme matériau constituant les éléments de construction.
