Abstract (en)
[origin: EP0463312A2] The device for the selective insertion of different types of cardboard comprises at least one actuator (7) which interacts with a motor unit (11) or optionally with a motion transmission unit (126). These units (11) allow to transmit motion at at least one means (16-21) for the selective enabling of the movement of the different types of cardboard (2,4), thus allowing a rapid and easy presetting thereof to allow their automatic loading. <IMAGE>
