Abstract (en)

The invention provides a device for removing a squeegee (3) from a stencil (2) of a printing machine. The device comprises a horizontal guide (5) placed on a stand and a carriage (6) which is displaceable along the guide and on which are fixed means for gripping the end part of a squeegee. In one of the embodiment of the invention a number of guides and associated gripping means (7) are arranged on the stand and the guide is pivotable between the horizontal position and a position varying from the horizontal position and the guides are rotatable in a horizontal plane around the stand. <IMAGE>
