Abstract (en)
[origin: EP0464228A1] Nozzle box (14) for an induction device (10). Its nozzles (15) are metal nozzles. The individual nozzle (15) has, on its foot attached to the nozzle box, an annular shoulder (24') and, connected thereto, a short connection piece (22) inserted in a hole (24) of the relevant wall of the nozzle box. Both the connection piece (22) and the hole (24) of the wall of the nozzle box assigned to it are in each case non-circular. The connection piece (22) is arranged in this hole (24) in an angular position, in which it is pressed against the edge of the hole (24) at at least two points arranged at a distance from one another. <IMAGE>
